mixing inquiry #36

# “Is there a mixer that can help us make smaller batches of creams and lotions efficiently?”

## The Silverson Solution

To help you achieve exceptional results with oil- or water-based creams and lotions, we recommend that you use a Silverson Batch mixer. This high shear mixer doesn’t simply mix; it emulsifies, homogenises, solubilises, suspends, disperses and disintegrates solids. Each mixer, with its precision-engineered Silverson rotor/stator workhead, far outperforms conventional mixers, cutting processing time by up to 90%.

- Suitable for batch sizes up to 1500 litres
- Rapid mixing time
- Consistent product quality and repeatability
- Agglomerate-free mix
- Stable emulsion

At Silverson we create mixing solutions from a truly unique perspective…yours. Give us a call or visit **www.silverson.com** and we’ll solve your mixing problem for you.
